

Exam V

Review Topics

Section	Topics	Problems
12.1	Linear, Constant Coefficient, nth order, <i>Homogeneous</i> Differential Equations D Operator Linear Combination General Solution Auxillary Equation <u>Case:</u> <u>(a) Real, Non-repeating Roots</u> IVP	Page 431 3, 7, 10, 13, 16, 21, 26
12.2	Linear, Constant Coefficient, nth order, <i>Homogeneous</i> Differential Equations D Operator Linear Combination General Solution Auxillary Equation <u>Case:</u> <u>(b) Complex Roots</u> <u>(c) Repeating Roots</u> IVP	Page 434 3, 7, 9, 14, 19, 22, 33, 46, 47
12.3	Linear, Constant Coefficient, nth order, <i>Non-Homogeneous</i> Differential Equations Complementary Solution Particular Solution General Solution Inspection Method IVP	Page 440 4, 9, 14, 20, 23, 25, 27, 45
12.4	Applications of Second-Order D.E. 1. Damped Oscillartory Motion Fundamental Equation Hooke's Law Newton's Second Law $w = mg$	Page 449 2, 6, 7, 11
Chapter Review		Page 450 2, 5, 9, 16, 21
